

CALL FOR PAPERS

SYMPOSIUM ON

MODEL ORDER REDUCTION METHODS IN MECHANICS

Sixth U.S. National Congress on Computational Mechanics

Hyatt Regency Dearborn Hotel, Dearborn, Michigan, USA

August 1—4, 2001

<http://www.usnccm.org>

SYMPOSIUM ORGANIZER: Petr Krysl

The 6th *US National Congress on Computational Mechanics* will be held on August 1–4, 2001 at Hyatt Regency Dearborn Hotel, Dearborn, Michigan, USA. I invite you to contribute to a symposium on *Model Order Reduction Methods in Mechanics* I'm developing for this congress. Increased output of papers on model order reduction in journals from various branches of science and engineering in the last couple of years seems to indicate that now might be a good time to discuss current theoretical foundations and computational challenges from distinct but related viewpoints. This symposium should serve as a forum for such a discussion. Therefore, while techniques of model order reduction for nonlinear dynamic problems may be of special interest, every aspect of this research area is likely to be well suited for this occasion.

Prospective authors should submit a one-page abstract via e-mail (include title, author names, affiliations, mailing address, telephone number, fax number, and e-mail address) to *pkrysl@ucsd.edu* by **January 31, 2001**. The abstract should outline the objective and main results of the work.

I would be delighted to have you or your colleagues participate in this symposium. Hope to see you in Dearborn!

Petr Krysl

Assistant Professor, Department of Structural Engineering

JSOE School of Engineering

University of California, San Diego

9500 Gilman Dr.

La Jolla, CA 92093-0085

Phone: (858) 822-4787; Fax: (858) 534-6373

E-mail: pkrysl@ucsd.edu; Web: <http://www.structures.ucsd.edu>

Please note the following *important deadlines* for this congress:

January 31, 2001	Receipt of all abstracts
March 15, 2001	Notification of Acceptance of Abstracts
May 31, 2001	Abstract in Final Form For Printing
